

January 17, 2026: Letter to Senator Ted Cruz

RE: The Absurdly Intrusive Spying from Donald Trump's Team

Senator Ted Cruz,

I am writing to inform you, again, of the absurdly intrusive spying program that Donald Trump's team is illegally using to cause a private nuisance to me and my family inside of our own home.

It is currently 2:13 a.m. and I am experiencing very loud vehicles that are being driven past my home to directly coincide with me doing extremely important religious work on my computer.

There is a constant effort by his team to 'match' me step for step in everything that I do - in work that is not affiliated with him in any way. Their team is not even 'protecting' Donald's reputation from some sort of news article or publication related to him at all.

Donald Trump's team is simply attempting to disrupt my home life and daily actives as a vengeful reminder that he is still around - stalking me, literally like a psycho would stalk an ex-lover. Donald Trump is exhibiting very serious mental health issues (through his team's absurdly illegal spying program) that must be addressed immediately.

Truly, Ted, Donald Trump is an embarrassment to the Republican Party and America as a whole.

Donald Trump has ruined the Republican Party for good. He is doing a damn fine job of ruining the reputation of America itself.

I promise you. We, the People, no longer support your party, your initiatives, or your leader.

I am giving you serious advise, now: Abandon Donald Trump immediately!!!

Donald's attempt to 'lead' America have irreparably harmed his own reputation, the reputation of the Republican Party, and the reputation of the United States of America.
